THE VARIETY

MOULDING MACHINE,

—FOR—

Straight, Waved, Circular and Elliptical Mouldings,

FOR SPIRAL WORK AND IRREGULAR FORMS.

This is the best, and, in fact, the only machine for all varieties of Moulding and Circular Planing to be used in House Building. For Circular Head Windows, outside Casings, Jambs, Parting Beads and Sash, this is the machine most needed and convenient. Circles for trimming are as easy worked as the straight mouldings.

Brackets of elegant pattern, Vergeboards, Fluted Columns, Carved Caps for the same, Lattice Work, Mantles and Fire Fronts, Gothic Mouldings of the most complicated patterns, Tracery and Arches for all varieties of Gothic buildings, churches, cottages, arbors and verandahs, Pew Arms, Panel Work, Ellipses, Ovals and all the forms which go to make an elaborate finish. It is useless to carry segments of circles to the turner's shop, or keep carvers at work on Gothic moulding. This machine, in such work, has the capacity for twenty first class mechanics. This, to the builder is the crafty worker of difficult pieces. It gives the pencil of the architect more freedom, and to the finish more precision, smoothness, and accuracy, than can be otherwise obtained.

We need not enumerate the advantages arising from such a machine. It is but repeating what has been said times without number, and that which is familiar to every man in the business.

All that is gained by machinery in straight work, is trebled in the various curved work of which we speak, because it is more complicated and difficult.

CONSTANTLY ON HAND

SASH, BLINDS AND DOORS

AND ALL KINDS MANUFACTURED TO ORDER.

BRACKETS

OF THE MOST MODERN AND BEAUTIFUL STYLES.

THE ABOVE WORK, IT IS CLAIMED, CANNOT BE EXCELLED,

IF EQUALED, BY ANY OTHER FACTORY IN THE STATE.

American, French and English Window Glass,

ALSO

FRENCH AND BRITISH PLATE GLASS.

UTICA, N. Y.
CURTISS & CHILDS, STEAM BOOK AND JOB PRINTERS,
Nos. 9 & 11 Fayette Street.
1867.

Builders will find the Mouldings finished in the best manner, and at prices that will save them from twenty-five to fifty per cent. over those worked by hand.

The prices marked in the several patterns within, are for one hundred feet running measure.

Patterns different from the within, will be worked to order on short notice.
